I've been there myself, and I KNOW how hard it is. So claps for you, Marcy Z Chavez!But now onto the splendid book that she wrote. "More Than Meets The Eye" is so wonderfully and

enticingly written for being written by a teenager. The characters draw you into their world and it's almost like you've become one of the characters. You can feel the emotions they're going through as if you were experiencing them yourself, and with the wide variety of genres, almost anyone can be pleased, whether you're a lover of sci-fi, romance, adventure or action. Not to mention that with the wide variety of characters that Chavez has created, there's someone that everyone can relate to in some way... whether you have special abilities or not :)An absolute recommendation, especially for those in their teenage years who love to get lost in literary worlds like myself.Five stars for you, Marcy Z Chavez, you go Marcy Z Chavez! We'll be receiving a great amount of literature from this young lady for a long, long time. Huzzah to you, and all our young authors out there!2 of 2 people found the following review helpful. awesomeBy BiniLoved it...couldn't put it down. Hopefully this author will make another book soon. Aria Sawyer always knew she was different. The girl born with burgundy-red hair, crystal blue eyes, and a birthmark on the inside of her wrist shaped like a small flame. She's lived an uneasy life, but when she turns sixteen her whole world flips upside-down. The same day the government recruits her to leave her everyday life behind and move into a top-secret facility immediately with three other teenagers who possess her same one-in-a-million condition; the beginning of the ABL race. When Aria and her newfound acquaintances learn of an uprising army against her and her race, will they take a stand to stop it?
