**Darcy Kuronen : Musical Instruments: MFA Highlights** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Musical Instruments: MFA Highlights:

0 of 0 people found the following review helpful. One of an excellent series By Dr The Museum of Fine Arts Boston is publishing a series of Handbooks-- some have the word Handbook or Highlights The backflip briefly states the aim To make available the greatest masterworks in the MFA To provide an informative, readable overview of various artistic genres, cultures and periods, for the use of students, visitors and scholars And over time to create a library that will act as a general tour of world art through the ages 2 of 2 people found the following review helpful. Superbly enhanced with 120 full color illustrations By Midwest Book Review Strongly recommended, especially for music school and community library Music History Studies reference collections and supplemental reading lists, Musical Instruments, author Darcy Kuronen showcases more than one hundred examples of drawn from the Museum of Fine Arts (Boston) collection exemplifying musical instruments down through the centuries and across a diversity of cultures both ancient

and contemporary. The pieces range from an ancient Greek Trumpet to a modern lap steel guitar, from simple earthenware panpipes to the exotic and sophisticatedly complex Indonesian gamelan. Superbly enhanced with 120 full color illustrations, *Musical Instruments* provides the reader with a full and comprehensive introduction highlighting the artistry and significance of musical instruments and their impact upon human civilizations.

Musical instruments are among the most meaningful artifacts produced by humankind, a marriage of technology, artistry, symbolism, religion and entertainment. *Musical Instruments* presents over 100 examples from the MFA's world-renowned collection, spanning a breadth of centuries and cultures, offering a brilliant array of instruments as producers of both aural and visual delight. The pieces shown here--which range from an ancient Greek trumpet to a modern lap steel guitar, from earthenware panpipes to the phenomenally complex Indonesian gamelan--are remarkable not only for the myriad sounds they produce, but also for their attractive, at times breathtaking, extraordinarily varied physical aspects. As objects of both cultural expression and sculptural craft, these are among the most exquisite and intriguing instruments ever created. More than a mere picture book, however, this latest title in the MFA Highlights series offers, as do its companion volumes, an accessible introduction to the genre, bringing to the fore the full richness, artistry and significance of musical instruments around the world.
