**Helen Buttfield : Posta Verdura (Postcard Book)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Posta Verdura (Postcard Book):

0 of 0 people found the following review helpful. Botanical postcards By THoward I really like this type of art. The postcards are interesting and certainly visually educational. If you didn't read the dimensions of this product please note that these postcards are SQUARE and therefore need additional postage in the USA. If anyone likes botanical artwork AND postcards then I would highly recommend this book. If you like botanical art around the home then these could be framed into square frames for some cheap, easily changed interest. 3 of 3 people found the following review helpful. Unique Thank You Cards By K. Price I came across Helen Buttfield's postcard books for the first time when visiting the Melbourne Museum shop a few years ago. I bought the Posta Insecta collection to use as thank you cards and recently when I ran out, was happy to find her other postcard collections are available from . Besides the beautiful artwork (which recipients often comment on) out of Posta Verdura's 30 cards, each picture is only repeated once, so great value for money. 0 of 1 people found the following review helpful. One Star By Jane Cochrane Terrific!

Botanical prints of all manner of vegetables combine with Helen Buttfield's wonderful stamps. Each stamp is drawn specifically to complement the engraving and feature a range of beneficial subjects, from good bugs to companion plants, top helpful animals. As always, this new work by Helen Buttfield carries her trademark botanical and scientific

accuracy coupled with a touch of wry wit.
