Michael E. Haskew : Postwar Artillery: 1945-Present (The Essential Weapons Identification Guide) before purchasing it in order to gage whether or not it would be worth my time, and all praised Postwar Artillery: 1945-Present (The Essential Weapons Identification Guide):

5 of 5 people found the following review helpful. well made bookBy P. ScheeI received this Postwar artillery book to show people what kind of mortars/rockets hit my unit in Iraq. It is very detailed and includes most all old and modern artillery for a decent price! Anyone that is into war items, or service members should get this book.0 of 0 people found the following review helpful. Five StarsBy IvoFantastic!0 of 0 people found the following review helpful. Five StarsBy cyclops- old 1 eyeGood Book.

The Essential Weapons Identification Guide: Postwar Artillery 1945–present offers an highly-illustrated guide to the

world's main artillery units and their weapons used since the end of World War II. This compact volume includes sample unit structures and orders of battle from divisional to corps and army level, providing an organizational context for key wars fought since 1945. Organized chronologically, the book is a comprehensive survey of units and their artillery weapons by war, including Korea, Vietnam, the Arab–Israeli conflicts, Indo-Pakistan wars, the cold war in Europe, the Yugoslav civil war, the Iraq wars and Afghanistan. All the major guns, missiles and mortar types are featured, with both towed and self-propelled artillery, for example, as well as anti-tank, anti-aircraft and other infantry support weapons. Less conventional forms of artillery are also included, including tactical and strategic missile systems, all combining to make this a rounded compendium of modern artillery weapons as used by the world's armed forces. Packed with more than 200 full-color artworks and photographs with exhaustive specifications, *The Essential Weapons Identification Guide: Postwar Artillery 1945–present* is a key reference guide for military modelers and artillery enthusiasts.
