From Whitman Publishing Publishing Whitman : Quarter Size Coin Tube: 5 Count before purchasing it in order to gauge whether or not it would be worth my time, and all praised Quarter Size Coin Tube: 5 Count:

0 of 0 people found the following review helpful. Not just for NumismatistsBy Roger SinasohnGiven that I used to be heavily into coin collecting, you'd think it wouldn't have taken me so long to make use of these. You see, I live in San Francisco where parking meters *start* at \$2.00/hour and go up from there. That's a lot of quarters. So, whenever we drive somewhere in the City, we bring along a roll of quarters just to feed the meters. Once opened, however, a partial roll of quarters can become a pocketful of loose change very easily. To avoid that problem, I picked up a set of these coin tubes. We keep them by the door, loaded with quarters, just for parking. No muss, no fuss. If you have to deal with quarters -- for parking meters, bridge tolls, arcade games, etc. -- I highly recommend getting a set of these to make your life easier. Best of all, they're eminently affordable. (Note: they're also available for dimes and nickels if parking meters in your city aren't quite so ravenous.)

The first one was perfect in that every one of the rolls allowed for a full roll of quarters. The second box had several that were defective near the bottom and did not allow for a coin to go completely flat. Like others have stated, the price of these tubes does outweigh the couple that were defective. The defective ones are still usable except not to full capacity. Since they are only used for pre-1964 and Bicentennial quarters, I am only adding quarters a couple at a time. I will continue to buy these because they do work okay.

3 of 3 people found the following review helpful. Very poorly designed productBy BoomerI've used similar tubes in the past, but these tubes are slightly too small in diameter, which makes loading and unloading coins a slow, aggravating experience. The tight fit creates a vacuum effect that makes it especially difficult to remove the last coin or 2 which can be a problem if you're pressed for time. Expect a lot of cracks to develop in these tubes.

Built to last, these high impact tubes with twist-off caps are built with excellent quality and durability. Inert Polystyrene. Each tube holds 40 coins.
