**Richard Abdy : Romano-British Coin Hoards (Shire Archaeology)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Romano-British Coin Hoards (Shire Archaeology):

This is not a study of Romano-British coins per se , but rather a study of hoards found in the former provinces of Britannia. It combines both an introduction to hoarding, discussing some of the major discoveries in recent times, and an outline history of hoards and coinage from the early conquest period to the 5th century AD. Most of the examples cited are in the public domain and can be found in museums.

About the Author Richard Anthony Abdy graduated from the University of Glasgow and now curates the later Roman and early Byzantine coins at the British Museum. His duties include participating in the recording and publishing of Romano-British coin hoards as part of the treasure process. This enables museums to judge whether they are worth acquiring or at least saves the information for posterity before their dispersal.
