**John Gunnell : Standard Catalog of Ford** before purchasing it in order to gage whether or not it would be worth my time, and all praised Standard Catalog of Ford:

This is the ultimate reference for identification, product history, model listings, serial number information, specifications, production totals and technical data on all Fords ever made. It provides collector-market values for Fords made during 1903-2001. It also gives Ford collectors the facts they need to identify, buy, restore and invest in

collectable Fords. The old-car hobby started with Ford and this brand of cars remains very popular with restorers. Hot rod enthusiasts are also extremely Ford oriented and will also be interested in this book since it supplies various specifications needed to "build" cars. These include weight, wheelbase, length and tyre size.

About the Author John Gunnell has been a Krause employee for nearly 30 years. He developed the format for the first Standard Catalog and has compiled most of the catalogues published to date.
